

ASSEMBLY OPERATION

LIFTING COMPLETE ASSEMBLY IN SINGAPORE SHIPYARD

HYDROPHONE DRIVE HOUSING

Hydrophone Deployment Systems

This closed system is designed to connect to and deploy through a sea valve and extend at least 2 metres below the vessel's keel.

The MSD proprietary Hydrophone Deployment System has been proven over the past 15 years and is in operation throughout the World.

Transducer Deployment Systems

The hang-off Deployment system can be delivered either through an existing slot or a specially designed 'I' tube.

Vortex shedding straits minimise vibration due to current or tidal forces.

DEPLOYMENT SYSTEM READY FOR PACKING

PTFE STAND-OFF ASSEMBLY

CAMERA DEPLOYMENT SYSTEM DURING INSTALLATION ON FOINAVEN

Camera Deployment Systems

The Camera systems can be run through either an existing slot or a specially designed 'I' tube.

Both colour and black and white cameras can be deployed at the same time, thus increasing definition. Riser Pull-in operations can be viewed at the base of the particular slot and beyond.

SYSTEM PACKED IN SPECIAL CONTAINERS
