# Seafastenings, Deck Layouts, Fabrication and Marine Engineering

As built Survey of Deck Grillage

## Survey

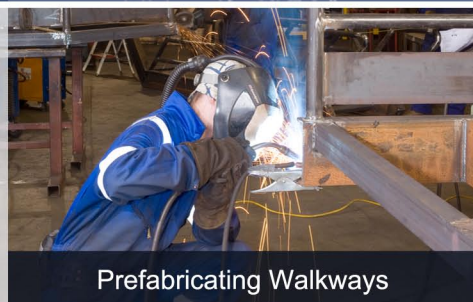

Our experienced and qualified staff are able to survey and assess even the most complex of jobs. Surveys are carried out with a safety first approach with risk assessments and method statements produced if and when required with Optional 3 Dimensional Surveys.

Stern Roller for Frac Sanding

## Design

Working with state-of-the-art CAD workstations and utilising the latest Autodesk software, design and details are produced to the highest standard. Calculations are produced by our engineers using STAAD Analysis and MathCAD hand calculations.

Prefabricating Walkways

## Manufacture

Steel fabrications and GRP products are created from detailed drawings provided by the draughting team. All manufacturing is subject to quality control by the Project Management team and third part if required.

Access Stairs and walkways to Accommodation Module

## Installation

If appropriate steelworks are manufactured in own fabrication shop minimising site time, but if required seafastenings will be defined on station and confirmed by engineering.

## Services to suit the industry
